**(54) IMPREGNATED MASK
COSMETIC AND IMPREGNATED
MASK COSMETIC
COMPOSITION USED THEREIN**

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain an impregnated mask cosmetic composition comprising specific ingredients and an impregnated mask cosmetic impregnated with the composition.

SOLUTION: This impregnated mask cosmetic composition is obtained by using a quince mucilage which is a vegetable thickening polymer and a carboxyvinyl polymer in combination as formulating ingredients thereof. Furthermore, the impregnated mask cosmetic is prepared by impregnating an absorbent such as a nonwoven fabric with the impregnated mask cosmetic composition. The close adhesive feeling is sufficiently recognized by thickening effects of the formulating ingredients without making the absorbent slip down from skin and excellent skin improving effects can be manifested on the skin even without recognizing a sticky feeling of use.
